March 16 2025

THE REAL IRAN

Many of you have seen my repeatedly posted report about the real Iran, (I looked for it on the Voterig server but it is not there, so that is not what this post is for. Instead, **Someone walked around Iran doing 20 minute cell phone videos of what it is actually like there.**

[THIS is what Trump wants to bomb.](#)

When you watch those videos, consider Iran has been under sanctions for decades now and does not have access to foreign markets, and Iran STILL kicks butt, all of it looks like Backbay in Boston or some other prime area. That is NOT a "shithole country".

My assessment of the Houthi attacks on ships:

They definitely have a point, and are expressing disgust for Israel's wipeout of Gaza. **However**, I don't think it is wise to attack a key shipping route repeatedly the way they have even if they do have a point, because it is impossible to know what ship is what and they will inevitably strike innocent targets. Plus, the Red Sea is NOT Israel. It is very unwise to attack this way, what can they expect as a result?

What Israel is doing is so many thousands of times more serious and horrific than attacks with weak weapons on ships, there's no doubt Israel is the problem so it is understandable why Yemen is at least trying to strike back somehow but the problem is that they are striking back at a limitlessly powerful monster in a very indirect way. It simply won't work.

They do have a point. The headline below is partial humor because you KNOW that video has to be part of the equation Israel has GOT TO hate a video like that, which happens to be **BANG ON**. It seems to be a snip out of a larger video, I wish I had the whole thing.

I think I just found the real reason why the United States is now blowing away Yemen.

When I found this I could not stop laughing. TOO PERFECT. I can't believe Youtube did not ban this.

You never get to hear the truth like that, the Houthis nailed it.

I at least got the Fukushima report working again.

Cornerstone report:
[Fukushima SABOTAGE!](#)

Fun times ahead!

BACKGROUND: ISRAELI POOP CANNON

Israel went around with shit cannons like this, blowing the windows out of Palestinian homes and coating them with shit for YEARS. Israel does this stuff and just expects the Palestinians to take it. And if any Palestinian then fights back they are called "terrorists" and then the bombs and bulldozers arrive. Yep, it's real poop from wherever the Jews can accumulate it. Videos like this are hard to find because they get censored. Right click while it is playing to download it.

Question: How depraved does a society have to be to even think about building specialized trucks to hose down houses with poop? These are the people you watch announce the news on CNN. These are the people controlling Trump. Not one step beyond potty humor in the worst way. Is this sophisticated or an example? Yes? or No? THAT HOUTHI VIDEO IS BANG ON.

March 15 2025

Normal news will resume here and Iran will get it's own section

I wanted to start posting some of this stuff in Farsi and after the embassy incident, which pretty much set my future, I will. I am not going to stop doing what I was going to do from abroad if there was nothing else to do just because of that embassy's incompetence. We'll have to see [how long this lasts](#).

War on Yemen.

UPDATE: TRUMP's GREATEST SUPPORTERS ARE DEAD SET AGAINST THIS ACTION

I am surprised. It is amazing how quickly his core support did a backflip, as I stated in my letter to the Iranian embassy "The American people do not want war on Iran" and I told them in that letter that this web site was the focal point that started it all 13 years ago. **I would bet they then hit the ratings sites, which they believe are legit, and said BULLSHIT.** Reality: At it's peak before the recent troubles, this site had a base readership plus re-posting elsewhere that smoked CNN by at least 5:1. Here is some intrinsic proof. Please wait, I am going to pull stats from one of the FORCED OFFLINE Jimstone.is servers, which is the only 1 of 7 I still have access to. Yes, Jimstone.IS was such a juggernaut it took 7 servers and had 29 terabytes of bandwidth. I usually only consumed 40-60 percent of that bandwidth but that's a shitload lemmeellya. [HERE ARE THE MONTHLY STATS FOR 1 of the 7 JIMSTONE.IS SERVERS](#) a short time before it was shut down forcibly. At least they did PressTV a favor of a nice ban screen, with me, they just simply took it and threw it in the trash because I was a WHOLE LOT more of a problem" obviously.

I don't know how much of the Houthi aggression is legit or simply Israel playing Hamas. Who knows. But it looks like GAME ON.

Donald J. Trump 
@realDonaldTrump

Today, I have ordered the United States Military to launch decisive and powerful Military action against the Houthi terrorists in Yemen. They have waged an unrelenting campaign of piracy, violence, and terrorism against American, and other, ships, aircraft, and drones.

Joe Biden's response was pathetically weak, so the unrestrained Houthis just kept going. It has been over a year since a U.S. flagged commercial ship safely sailed through the Suez Canal, the Red Sea, or the Gulf of Aden. The last American Warship to go through the Red Sea, four months ago, was attacked by the Houthis over a dozen times. Funded by Iran, the Houthi thugs have fired missiles at U.S. aircraft, and targeted our Troops and Allies. These relentless assaults have cost the U.S. and World Economy many BILLIONS of Dollars while, at the same time, putting innocent lives at risk.

The Houthi attack on American vessels will not be tolerated. We will use overwhelming lethal force until we have achieved our objective. The Houthis have choked off shipping in one of the most important Waterways of the World, grinding vast swaths of Global Commerce to a halt, and attacking the core principle of Freedom of Navigation upon which International Trade and Commerce depends.

Our brave Warfighters are right now carrying out aerial attacks on the terrorists' bases, leaders, and missile defenses to protect American shipping, air, and naval assets, and to restore Navigational Freedom. No terrorist force will stop American commercial and naval vessels from freely sailing the Waterways of the World.

TO ALL HOUTHI TERRORISTS, YOUR TIME IS UP, AND YOUR ATTACKS MUST STOP, STARTING TODAY. IF THEY DON'T, HELL WILL RAIN DOWN UPON YOU LIKE NOTHING YOU HAVE EVER SEEN BEFORE!

TO IRAN: SUPPORT FOR THE HOUTHI TERRORISTS MUST END IMMEDIATELY! DO NOT THREATEN THE AMERICAN PEOPLE, THEIR PRESIDENT, WHO HAS RECEIVED ONE OF THE LARGEST MANDATES IN PRESIDENTIAL HISTORY, OR WORLDWIDE SHIPPING LANES. IF YOU DO, BEWARE, BECAUSE AMERICA WILL HOLD YOU FULLY ACCOUNTABLE AND, WE WON'T BE NICE ABOUT IT!

15 Mar, 2025 18:59 / [Home](#) / [World News](#)

Trump launches 'powerful military action' against Houthis

The US president demanded the Yemeni-based militants stop their attacks on ships immediately or face "hell"

I wanted to do a huge post about the Alawites in Syria "killing everyone" but I should keep the Iran stuff on the top of the page.

I'll just say what is going on there. Israel was under too much heat for killing everyone indiscriminately so a new boogie man was needed, so suddenly Alawites sprouted thousands of guns and THEY started doing all the killing. ONLY NO, It's still Israel performing operations under a false flag.

COMMON SENSE.

March 14, 2025

TO THE DOD:

You cannot do ANYTHING because EVERYTHING I gave them was in full compliance with secrecy and disclosure agreements, which set the limit at 15 years. It does not matter that I was as brilliant as I was, and knew far beyond my clearance level. This enabled me to simply observe what the media was saying to influence nations such as "country X is backwards because they are refusing American movies". I knew that as long as I heard that in the news, YOUR PROGAM WAS STILL IN PLACE IN FULL FORM and therefore I knew IT ALL. And I KILLED IT DEAD, TOTALLY LEGALLY

You can't throw me in jail for that, all you can do is anonymously detain me indefinitely, drug me, poison me, or kill me and you have tried ALL OF THOSE and failed, because well, I knew the antidotes, the methods, and the cures and to top it off, as far as the detainments went, there were white hats in the works so those failed also. Like it or not, some of your own people hate what you are doing and that helped me a lot.

AND I WAS RIGHT when I helped Iran.

FACT:

You lied about Saddam and you had no reason to destroy Iraq, and YOUR OWN DISCLOSURE SAID SO.

You lied about Libya, but your statutes of limitations have not run out on that, so you are STILL LYING.

You have lied about ALL WARS for the last 35 years, including Afghanistan, which you destroyed when YOU KNEW ISRAEL DID 911. YOU KNEW IT. Carl Cameron on Fox News knew it and reported it also. That's the biggest fart in your face fraud that ever was and YOU KNEW IT, and you STILL destroyed Afghanistan so Bush could put a pipeline in that the Taliban did not want. *You will keep lying about 911 because if you EVER tell the truth about that Americans have too many guns.*

BOTTOM LINE: YOU ARE A FRAUD. And I will do EVERYTHING to stop you from wiping out yet another totally innocent country even if it costs me my lifeblood to do it.

Doing what it took to stop your rampage against the innocent for profit has already cost me at least a normal life, what do I have to lose by dying or being destroyed even more? NOTHING.

March 13 2025

Due to a huge mistake that happened recently at Iran's Mexican embassy I am going to start posting in Persian

Update: Persian will be moved to its own page but not today. All updates will be below the persian section.

I am getting a large number of visits from Iran, and at this time getting a message through is simply too important. Iran has gone to approximately number 25 which is a LOT for a non-English speaking country and I think the people I actually need to communicate with are hitting this. So, for now:

خبری‌یک مواجهه بسیار نامیدکننده با سفارت شما در شهر مکریکو داشتم. شاید آنها متوجه نشدند که من کی هستم و چقدر نفوذ دارم. ایندا فکر کردم که آنچه اتفاق افتاده را به انگلیسی منتشر کنم، اما باور داشتم که این کار به کشور شما اسباب زیادی موزون، زیرا این وبسایت احتمالاً همان چیزی است که باعث شده بسیاری از امریکایی‌ها از کشور شما حمایت کنند، که این حمایت شما را از جنگ در امان نگه می‌دارد. این وبسایت نقطه تمرکز بسیاری از ناشران دیگر است و اگر من آنچه را که آن سفارت انجام داد منتشر کنم، احتمالاً مشکل بزرگی ایجاد می‌شود. انتشار آن به زبان پارسی، به شکلی که من آن را نوشتند، مانع از آن می‌شود که خوانندگان بتوانند آن را به صورت معمکوس ترجمه کنند و این شما را در امان نگه می‌دارد: خطاهای جد نفر با یک سفارت نیاید عواقی برای کل یک ملت به دنبال داشته باشد. من باید کل این رویداد را به پارسی ترجمه کنم، این چیزی فراتر از بد بود، وحشتناکتر از حد تصور بود، شما هیچ حامی‌ای با نفوذتر را بهتر از من ندارید.

از من ترسید، من دوست شما هستم.

I found a fantastic AI far better than ChatGPT for this and I won't say which one to avoid having sabotage be written into its code. Google translate lies straight up, I tried Google for this, then plugged the output into DeepL and reversed it to English and all it did was basically say "I hate you", and THAT is criminal sabotage Google is pure evil and the Persians trust Google like a saint. VERY BAD. There's no way a real translator could get it that wrong, **To Persians, DO NOT use Google translate for ANYTHING, Google is owned and programmed by literal demons.**

Find something better ffs!!!!

If anything said in Persian is offensive it is because an AI changed it while I was away. I am going to remedy that possibility asap.

General Flynn informed Alex Jones that Ukraine has a hit out on him

I don't believe Ukraine, I believe Israeli mossad agents operating on behalf of Ukraine though.

Already one top infowars reporter is dead, I think we all need to watch out.

I am too stressed from the last few days and am falling asleep constantly

The main thing I wanted posted is done though. I will try to post later today.

Trump has proposed no income tax on people who make less than \$150,000 per year

It would be better if he clarified that "income tax" is really for things like stocks and bonds, and that what everyone calls "income tax" is really a tax on wages, which was never approved but became the norm via coercion

Blood moon not a big deal

I hopped on that bandwagon before, but the truth is that blood moons happen frequently. Which blood moon is supposed to be the disastrous one then?

The real news is that the Blue Ghost lander is supposed to be focusing in on a solar eclipse as it appears on the earth for the very first time. over all the moon and space missions so far, none have been able to photograph what is seen from the moon during a solar eclipse. It should look like a diffuse circle with a black spot in the center

Something I keep forgetting to mention about Google's Willow chip

Google's Willow chip had 105 qubits, which is far less than other quantum processors from other companies.

IBM's Condor chip has over a thousand qubits and happened over 6 months before Willow

A 1,000-qubit quantum chip is a quantum processor that contains over 1,000 qubits, which are the quantum equivalent of digital bits. IBM announced the first 1,000-qubit quantum chip in December 2023, called Condor, which has 1,121 qubits. 

IBM made no claims about vastly superior computing however, and probably for a good reason. REASON: Processors need to transfer the data off their chips and into memory and back into the chip to do processing. Who is the master of bandwidth? GOOGLE. And therefore, there's a good chance that Google stomped IBM with only 1/10th the qubits. If you can't move the data outside the chip, you won't get good results.

Still falling asleep constantly. Tomorrow is another day.

March 11 2025

I am out of town so updates might be sketchy. Found a great "totally random computer" so here is an update.

DO NOT MISS: I GOT CHATGPT TO TELL A VERY DETAILED TRUTH ABOUT HARDWARE LEVEL NSA VULNERABILITIES, SOLID GOLD IN TODAY'S POST.

Still laughing. That's not supposed to happen.

UPDATE, I POSTED SOME VERY PERTINENT STUFF DOWN BY SNOOPY, VERY IMPORTANT DO NOT MISS.

Alex Jones host swatted the same day another was murdered.

I don't have the details on this other than that, there is subversion going on and you can't get the truth about this easily on the web, [It is well covered on Infowars](#). Since all I can do is quote them I might as well just link.

UPDATE: I HAVE SOLID GOLD HERE, I GOT CHATGPT TO BUST THE NSA BY ASKING THE RIGHT QUESTION, READ ALL THE WAY DOWN TO SNOOPY!!!!

HA HA HA HA HA HA HA HA HA HA!!! CAN'T BELIEVE I GOT A PERFECTLY STRAIGHT ANSWER THAT WAS LITERALLY A BREACH OF NATIONAL SECURITY.

Takeout: I have been proven correct with everything I have ever said about processor level backdoors, if any country is using any of the chips I am talking about here for anything critical, they will be shut down when you need them most. IN WAR, YOU WILL LOSE AUTOMATICALLY IF YOU USED ANY OF THE CHIPS I MENTION HERE.

I started the report like this:

Huawei has a new version of HarmonyOS that might be NSA proof when paired with a newer Kirin chipset. **There is a problem though -**

Google search results for "kirin is based on ARM" in Spanish. The search bar shows the query. Below it, a list of search results is displayed, with the first result being a snippet from a news article. The snippet discusses the Kirin chips by HiSilicon Huawei, mentioning they are a product of licensed use of ARM's architecture, combined with significant in-house innovation and enhancement. The date of the snippet is 4 jun 2024.

Sugerencia: Mostrar los resultados en [español](#). También puedes obtener más información para [filtrar por idioma](#).

The Kirin chips by HiSilicon Huawei are [a product of licensed use of ARM's architecture](#), combined with significant in-house innovation and enhancement. 4 jun 2024

If Huawei did not completely re-do the absolute root of ARM architecture, Kirin is as bad as any other chip when it comes to security.

ARM architecture is an NSA approved architecture. That means that on an ARM chip there is a separate sub processor running that is not something the user of the device gets to use.

The ruse is that the processor needs the second processor to manage itself and the hardware on the phone, **but the reality is that it's an NSA back door that has about 1,000 different access points most likely with a SHA512 password**. Everyone worth their salt in security knows these second processors are there on AMD, INTEL and ARM and no one has EVER cracked a single back door. At least not one of us has.

What processors do I know for sure are compromised?

All Centrino processors. All processors that have Vpro tech, **And every processor Intel has made since Sandy Bridge. EVERY INTEL PROCESSOR MADE SINCE JANUARY 2011**. You cannot secure ANY intel processor made starting 2011 and it does not matter which one it is. Intel experimented with this with Centrino and that tech went global to all Intel chips in 2011.

AMD is also not secure anymore, I have recently discovered that AMD totally hopped on the NSA bandwagon in 2012, a year after Intel did and AMD may have compromised chips before that date, the same as Intel.

ARM architecture is the same also, this is confirmed by the fact that Pegasus spyware permanently infects ARM chips and there WAS a removal tool for Pegasus released by Amnesty International but my guess is that the tool no longer works, **And Israel's Pegasus is based on NSA spyware, it is not developed in Israel as advertised, and Amnesty International never did anything to get the NSA off anyone's phone.**

Pegasus was INITIALLY written in Israel and was a hunk of crap up until 2017 when a security breach at the NSA resulted in their spyware getting posted to the internet. Pegasus got that, and that has been the Pegasus core ever since. No patch has ever been made to patch against the NSA security breach despite the software landing in the hands of bad actors because the NSA, being totally rectal, does not want to let go of their toy and has not re-written it to compensate since 2017 because they don't want to let go of devices that are that old.

The bottom line is that if you have ARM, or any processor from AMD or INTEL that is in any way new, and it does not matter if it is an Iphone or anything else, they NSA owns the device.

Here is proof that your Iphone is not secure, I don't have to google this crap but whatever,

[Apple issues spyware warnings to iPhone users across 98 ...](#)

15 jul 2024 — Apple has issued a new round of threat notifications to iPhone users in 98 countries, informing them that **mercenary Pegasus spyware** may be used on their phones.

If pegasus can nail your Iphone, the NSA can too. It's the same software. Oh, I want an IPHONE because ANDROID is not secure, Google will spy on Andriod!!!! IDIOT.

I have heard that before. Many times. FOR THE RECORD: STEVE JOBS, WHO CARED, IS DEAD.

The only way Huawei's Kirin would be secure is if through their modifications they accidentally got rid of the back doors. Most likely they did not, because the back doors are in the very root of the architecture.

So I asked Chat GPT if Pegasus could infect HarmonyOS and CHAT GPT GAVE A WRONG ANSWER.

Because of the way I phrased this question, ChatGPT did not respond that the real vulnerability is the ARM based chip itself. And if Huawei did not remove the back doors in the Kirin chip itself, someone random is going to be able to nail that chip. And then it's game over.

For what it is worth, here is ChatGPT's DEAD EFFING WRONG answer, WHEN USING AI, ASK THE RIGHT QUESTION, HERE CHATGPT SAYS THERE'S NO RECORD OF PEGASUS HITTING HARMONY OS.

Since this answer is BULLSHIT, I am going to double small it, and then post the real answer, given with the question asked the correct way.

Can pegasus spyware infect Huwawai harmony OS

Pegasus spyware is a sophisticated surveillance tool developed by the Israeli firm NSO Group, and it has been known to target various mobile operating systems, primarily iOS and Android. HarmonyOS, developed by Huawei, is an operating system designed to work across multiple devices like smartphones, tablets, and IoT devices.

While there hasn't been specific public documentation or widespread reports of Pegasus targeting HarmonyOS directly, it's important to note a few things:

Security and Targeting: Pegasus spyware generally exploits vulnerabilities in operating systems to infiltrate devices, and it's more commonly associated with Android and iOS due to their widespread use. HarmonyOS is relatively new, and its security features might not have been as heavily scrutinized or targeted by cybercriminals compared to more popular operating systems.

Cross-Platform Potential: If HarmonyOS shares any code or security similarities with Android (as Huawei has mentioned that HarmonyOS has elements built on AOSP, Android's open-source platform), there's a possibility that vulnerabilities in Android could also impact HarmonyOS. If that's the case, there could be a vector for Pegasus-like spyware to affect it.

Security Measures: Huawei's HarmonyOS focuses on security features like secure boot, data encryption, and application sandboxing, which may reduce the risk of spyware infection. However, no system is entirely immune to new exploits or vulnerabilities that could be discovered in the future.

In conclusion, while there's no concrete evidence that Pegasus has specifically targeted HarmonyOS, the evolving nature of cybersecurity threats means it's always possible for new spyware to be adapted to different platforms. Regular updates and security patches remain essential to protect against these kinds of threats.

NOW HERE IS HOW YOU ASK A QUESTION WHEN YOU KNOW WHAT THE HELL IS GOING ON:

Are you aware of the fact that Pegasus and NSA spyware can target ARM architecture directly irrespective of what operating system it is running?

ChatGPT responded

Yes, you are correct that certain sophisticated spyware, including Pegasus and tools linked to the NSA, can target devices based on their hardware architecture (such as ARM), irrespective of the operating system running on the device.

Here's how this works:

ARM Architecture and Exploitation:

ARM-based processors are widely used in mobile devices, including smartphones and IoT devices (e.g., most Android devices, including those running HarmonyOS).

Attackers can exploit vulnerabilities in the hardware layer, including firmware and bootloaders, to compromise a device at a very low level before the operating system even has a chance to load.

This type of attack can be more difficult to detect and defend against, as it operates below the level of the OS and can persist even if the OS is reinstalled or updated.

Firmware Attacks:

Some advanced malware, including Pegasus (and some NSA tools), can target vulnerabilities in device firmware. This allows attackers to exploit low-level functions of the device's ARM-based architecture.

These attacks often involve zero-day vulnerabilities in the bootloader, firmware, or even in trusted execution environments (TEEs) such as ARM's TrustZone.

NSA and Targeting Hardware:

The NSA has developed various tools for hardware-based surveillance, which can bypass the operating system entirely. For example, they can target vulnerabilities in ARM's architecture, exploiting weaknesses in the secure boot process or other low-level system functions.

The NSA has used hardware implants and firmware exploits that can bypass conventional OS-based security measures.

Cross-Platform Attacks:

Given that both Pegasus and some NSA tools can target vulnerabilities at the hardware and firmware level, they can potentially affect devices regardless of the operating system, as long as the right access to the ARM architecture is achieved.

For example, they may exploit flaws in bootloaders or trusted execution environments (e.g., ARM TrustZone) to gain control of the device before the OS even loads.

Conclusion:

While operating systems like Android or HarmonyOS can provide layers of defense, ARM architecture-based vulnerabilities can be targeted directly by advanced spyware, bypassing the OS. This is one reason why firmware and hardware-level security are critical in defending against such sophisticated threats. Both Pegasus and certain NSA spyware have been capable of targeting these lower layers of a device, making them harder to defend against purely with OS-level protections.

SO I have discovered that it IS possible to get ChatGPT to give a straight answer, you just have to ask the question from a position of knowledge, that's all!!

Do not ask if I am right about AMD and INTEL, I don't need to ask ChatGPT for that, I did not need to ask about ARM either. I am the definitive source on security ffs.

HOW DO YOU SECURE YOUR SYSTEM? ANSWER: YOU CAN'T UNLESS IT IS AN ISOLATED SYSTEM WITH AN OLD CHIP AND ANYONE WHO TELLS YOU YOU CAN IS FULL OF SHT.

Do I have to go over the full time 3g or newer cell connection all processors have now and have had since 2011? Sitting there in "listen" mode not transmitting anything but probably can if asked? How about going back and reading "[Is Intel's Sandy Bridge on a road to nowhere?](#)" Posted on my site when it was still blue. HA, I have to go back and finish that, but it says enough as is. Maybe I won't. The bottom line is that the 3g linked suicide circuit was talked about in 2011 and now ChatGPT knows nothing about it. If the links got edited or changed, that article was not crap when I posted it. If your defense system uses ANY of those chips I mentioned above, it's going POOF right when someone else needs it to.

The Department of Education has officially been completely vacated.

Good. Let's see who is willing to pay for them in the private sector, once the private sector realizes that "woke" is not accepted.

VERY FUNNY: CANADA STOPPED DIRECT ACCESS TO ALASKA.

Now the US cannot ship from the mainland to Alaska via rail and semi tariff free. Let's see how long this lasts.

BLOCKBUSTER: POLITICO, A TERRIBLE RAG that got a LOT of USAID support, busted USAID.

The top directors of USAID who are still in place told the remaining employees to immediately shred and burn every paper document that was still there. USAID is shredding and burning all the proof of corruption that could get people jailed.

It is a real shock that Politico reported this.

It is highly possible that Politico is trying to save its own butt from getting third degree burns by playing the "real reporter" after the police arrived at the party.

Trump should have just fired every last employee there and ordered everything seized day one. What did he expect???

→ C politico.com/news/2025/03/11/usaid-official-tells-r... Verifica que eres tú

A senior official at USAID instructed the agency's remaining staff to convene at the agency's now-former headquarters in Washington on Tuesday for an "all day" group effort to destroy documents stored there, many of which contain sensitive information.

The materials earmarked for destruction include contents of the agency's "classified safes and personnel documents" at the Ronald Reagan Building, said an email sent by USAID's acting executive director, Erica Carr, and obtained by POLITICO.

PEOPLE SUSPECT PAM BONDI IS IN ON THIS, HENCE THIS FROM FLYNN

BREAKING: General Mike Flynn calls for Attorney General Pam Bondi to issue arrests after an email showed instructions to USAID employees to shred documents.

5:46 PM · Mar 11, 2025

ⓘ

People are far from excited over this from Flynn, because Flynn no longer has power, he only has influence and it is now evident something is SERIOUSLY amiss with Pam. Trump is probably getting Kushnered by her.

March 8 2025

Gallup poll: American support for Israel at an all time low.

You can safely bet this poll is skewed strongly upward for Israel to boot, I would not be surprised at all if the lines have actually crossed.

WHY would the lines have actually crossed? Easy:

UPDATE: The following two photos have been modified by AI.

I have had these photos since 2002. In the original versions, the "militant" on the left was an obvious FAT Imam in flip flops. Now he's more militant looking. In the photo on the right, it was originally a mother with three children where the mother was sitting up and the three children were lined up with the first one hugging the mom and the second two holding onto the first, it was obvious IDF troops burned a live family in place and the children were clinging to mom, hoping she could save them. The out take on this is that there's an AI on the loose that can access any processor via that back doors I mentioned above, and modify photos so they are not so damning.

The picture of the burned family must have gotten changed by AI

In the original, the mother was sitting straight up and 3 children were also sitting straight up, clinging to each other and their mom. Now it just looks like a pile of burned bodies. So it goes, when con job Israel has it's way with quantum computing and absolutely no processor can be secured. **So I am going to remove the caption.**

I captioned those photos very insensitively to create a PR disaster for Israel as Israel moves on to destroy yet another country. Americans don't realize it, but Israel destroyed America via psy ops without firing a single shot. They could not do that to Iran, so shock and awe 2, possibly complete with nukes it will be. Once the society is shattered

they'll be able to go in and satanically corrupt it the way they did the United States. The attack on Iran is not about nuclear weapons, it is instead a "holy war".

Or should I say unholy?? I wonder how many children Israel is murdering outside the abortion clinics to get the go-ahead on Iran from satan himself?

So how has the Jewish community corrupted America? Like this following tweet, **There's little doubt Trump is in part trading Iran's life for permission to at least try to save America**. The Jews, in the end, will reneg on all deals.

 Secretary Brooke Rollins 
@SecRollins

 CANCELLED: \$600,000 grant to study "menstrual cycles in transgender men"

March 7 2025

Don't think Iran is toast? Look at this:

 Faytuk's Network 
@Faytuk'sNetwork · Follow

 U.S. Treasury Secretary Bessent warns Iranians: "If I were Iranian, I would convert all my money into something other than the rial right now."

2:21 PM · Mar 7, 2025 

I don't believe Israel is after Iran's nuclear program. I think Israel is after IDEOLOGICAL SUPERIORITY. So even if Iran hands Israel everything nuclear immediately while whimpering like a simp, Israel is going to attack anyway. A simple attack on nuclear facilities would not cause the US treasury secretary to post that, only a new "shock and awe" that completely destroyed Iran would.

PROBABLE CLASSIFIED INFO TO PREVENT A NUCLEAR CATASTROPHE IN IRAN

In 1989, while I was in an NSA scif, I got the following information but it was just in general conversation, and I don't know if it is classified.

In 1989 the U.S. military was experimenting with bunker buster bombs near Denver Colorado. The experimental designs did not have explosives in them, they just wanted to see how far they could penetrate granite with a low budget. **The winner:**

THE WINNER was a large world war 2 artillery gun barrel that was outfitted with a penetrating tip at the small end, and fins at the large end. The design consideration was that the inside of the barrel itself was the space the explosive charge would go in, so they filled it with inert material with approximately equal weight, they did not want these bombs to go off. They wanted to dig the bombs out after the drop to see how far into granite they went.

They dropped all of the bomb designs from 40,000 feet and when they dug down to the one based on an artillery gun barrel, it penetrated 189 feet. That's approximately 50 meters. **50 meters into solid granite.**

So when you look up the specific gravity of 4140 steel, which the artillery barrel was likely to be made of, it has a specific gravity of 7.83. And the hardness is 54-59 HRC. **Do you think they made the CLASSIFIED bunker busting bombs with that? You know, the bombs that other countries are not allowed to buy, and you won't find them listed anywhere? I don't. I think they probably used tungsten.** Why not tungsten? Why settle for a specific gravity of a mere 7.83 when you can have a specific gravity of 17 instead? And about the hardness - Why settle for a hardness of 54-59 HRC when it could be 69 - 81 instead with tungsten?

How far would a tungsten based bunker buster penetrate if it used the gun barrel design with ZERO improvements? More than 200 meters when you calculate deceleration rates with the added weight, not even factoring in the added hardness.

And depleted uranium would be even worse. **Bottom line:** Fordo is TOAST. Kiss it away. **Why did Norad move their main operations out of Cheyenne mountain? My guess is that the results of the real bunker buster tests showed it to not be viable anymore. CHEYENNE MOUNTAIN IS 610 METERS DEEP.**

So what should Iran do right now, with Trump getting all belligerent about an imminent strike on nuclear facilities?

Iran should consider the fact that the (advertised) bunker busters are BULLSHIT and that's not what is going to be used. Iran should consider a place like Cheyenne mountain to not be enough protection. **Iran needs to avoid a nuclear disaster by getting off it's butt RIGHT NOW AND:**

1. Shut down Bushehr IMMEDIATELY and take the core out IMMEDIATELY and get it off site or at least to a location where if there is a hit on the facility, Iran does not end up with Chernobyl 4X. Lights out. Better than a catastrophe.

2. Kiss the centrifuges goodbye, they are pathetic trash anyway and get the nuclear materials to a location, you know, like YOUR DEEPEST MINE and hide them there IMMEDIATELY so they don't end up spewed all the way to the Lut. Forget procedure, you have a national emergency on your hands, and it is called: NOT DIGGING A HOLE when you had all the time in the world to do things right. Fordo is TOAST. If anyone wondered why Norad moved their main ops out of Cheyenne mountain, it's because the real bunker busters would bust that mountain.

The bottom line:

Iran needs to kiss it's nuclear projects away, at least for a time. All those materials need to be put in a mine that has

tunnels MILES underground so that if they do get struck, Iran won't be a toxic wasteland.

HEADS UP: ALL MY JENIN FILES GOT DELETED OFF ARCHIVE.ORG PLUS 3 DIFFERENT SERVERS.

Why would this happen right when Trump is threatening to annihilate Iran? Easy answer: Because when they show Israel burning women and children alive with gasoline, well, that's bad PR while they are wiping out a country very few Americans want to attack.

BUT WAIT, THERE'S THIS: THEY FORGOT TO WIPE THEM OFF ALL THE CYBER CAFE COMPUTERS I HAVE BEEN FORCED TO USE WHILE HOMELESS. That is what you call having a censorship effort BACKFIRE. And there are a lot more on this "totally random computer" than that. I hit the jackpot by sheer luck. Let's give these images of Jenin, which even the Arab press is afraid to post because they are afraid they will be called "anti-semites" formal names.

Left: Israeli soldiers celebrate Ramadan. I removed the caption for the image on the right because it got changed by an AI to not match the caption.

These are both obvious war crimes, it is obvious the woman and her children were not casualties of a larger military op, they were simply burned alive while the children clung to mom hoping she could save them.

Oh, but that's ANTI-SEMITIC. Any truth that makes you hate Israel and the greater Jewish community is ANTI SEMITIC. Caveat: The truth is not antisemitic, the truth simply happens to be what it is.

After looking at that, now realize that Trump is walking in lock step with these people for THIS:

 Disclose.tv  [@disclosetv](#) · [Follow](#)

NOW - Trump says "interesting days ahead" with Iran, saying "something's going to happen very soon."

11:52 AM · Mar 7, 2025

Don't think Iran is toast? Look at this:

 Faytuks Network  [@FaytuksNetwork](#) · [Follow](#)

🇺🇸 U.S. Treasury Secretary Bessent warns Iranians: "If I were Iranian, I would convert all my money into something other than the rial right now."

2:21 PM · Mar 7, 2025

I don't believe Israel is after Iran's nuclear program. I think Israel is after IDEOLOGICAL SUPERIORITY. So even if Iran hands Israel everything nuclear immediately while whimpering like a simp, Israel is going to attack anyway. A simple attack on nuclear facilities would not cause the US treasury secretary to post that, only a new "shock and awe" that completely destroyed Iran would. **How is Trump going to reduce Iran's oil exports to a trickle? Easy: "shock and awe" the oil industry and kill everyone who could fix it by destroying civilian areas. How else could that be done?**

March 5 2025

Trump needs to WAKE UP.

Hamas never took hostages without Israeli approval and funding, plus a few Mossad agents, the Israeli black op REALLY WORKED.

Israel creates the problem, stirs the pot, and gets served up FREE BOMBS. If Trump is this ignorant, Israel is going to take the terror ruse far beyond the bank.

If Israel can play Trump for a sucker that much, they will play him all the way to a wipeout of Iran and the rest of the middle east. This is actually a serious problem.

Of course this Wikipedia about [Israeli support for Hamas](#) is scheduled for deletion, because it says the truth. At least Wikipedia did not simply kill it outright.

Use of Hamas to undermine the Palestinian Authority

In an interview with [Politico](#) in 2023, former Israeli Prime Minister Ehud Olmert said that "In the last 15 years, Israel did everything to downgrade the Palestinian Authority and to boost Hamas." He continued saying "Gaza was on the brink of collapse because they had no resources, they had no money, and the PA refused to give Hamas any money. Bibi saved them. Bibi made a deal with Qatar and they started to move millions and millions of dollars to Gaza."^[25] At a [Likud](#) party conference in 2019, Benjamin Netanyahu said:

"Anyone who wants to thwart the establishment of a Palestinian state has to support bolstering Hamas and transferring money to Hamas... This is part of our strategy – to isolate the Palestinians in Gaza from the Palestinians in the West Bank."^{[26][27]}

Prime Minister Netanyahu responded to the accusations of funding and strengthening Hamas by calling them "ridiculous".^[28]

Bezalel Smotrich, a far-right lawmaker and finance minister under Netanyahu Government, called the Palestinian Authority a "burden" and Hamas an "asset".^[29]

Allegations of Israeli support for the creation of Hamas

On January 19, 2024, [Reuters](#) reported that Josep Borrell, the EU foreign policy chief, said while receiving an honorary doctorate from the [University of Valladolid](#) that "Israel had financed the creation of Palestinian militant group Hamas, publicly contradicting Prime Minister Benjamin Netanyahu who has denied such allegations." and that "Borrell added the only peaceful solution included the creation of a Palestinian state. 'We only believe a two-state solution imposed from the outside would bring peace even though Israel insists on the negative,' he said."^{[30][31]} Borrell also described Israel as having "created Hamas", but immediately continued saying that "yes, Hamas was financed by Israel to weaken the [Palestinian Authority](#)".^{[32][33][34]}

Professor Avner Cohen, a former Israeli religious affairs official, publicly acknowledged that Hamas was "Israel's creation."^[35] Similar statements have been made by [Yasser Arafat](#).^[36]

Use of Hamas as a tool to disengage from peace talks

Shlomo Brom [\[he\]](#), retired general and former deputy to Israel's national security adviser,

believes that an empowered Hamas helps Israeli Prime Minister Netanyahu avoid negotiating over a Palestinian state, suggesting that there is no viable partner for peace talks.^[24]

It is easy to prove Hamas is an Israeli puppet.

Just observe. Every time peace is successfully negotiated with Palestine, Hamas attacks!!! Coincidence? **Well, is that tweet from Trump what Israel wants? YES, OR NO?**

By the way, I was onto this in 2002 after the Jenin massacre, I knew Palestinian terror was fake because the timing was absolutely perfect. Every time there was going to be peace the Palestinians desperately wanted, attacks from Palestine soon followed to end all hope. IT AWAYS GOES PERFECT FOR ISRAEL. **Nothing has changed since.**

European leaders are calling for war with Russia.

They are doing it indirectly, by saying russia needs to be pacified (France) Our military must be fully prepared before the end of March (Germany) and all are saying they might have to go it alone without the United States, Macron is offering nukes, while saying the US is aligning with Russia. **I think nuclear war with Russia is on the table as European oligarchs rebel against their constituents after rigged elections.** Obviously Europe's elections are rigged after the people's reaction to JD Vance was so opposite that of the leadership. That does not happen without vote fraud. And that is one thing the leaders are going to have to consider before war with Russia, their people do not support them AT ALL.

This is another slow news day. So I am just going to meander a bit.

Grok was asked when AI was created. Grok replied 2010 in the U.S. and 2014 in China.

Here is the correct answer: AI was well underway and spoken of in the NSA by 1990. I estimate the first computer that would be capable of running a modern AI version would be the Cray 2 in 1985, which accomplished 1.9 gigaflops. That's still less than a Raspberry Pi right now, by about 5x but the modern raspberry Pi can run OpenAI well enough to have it beat the online version. AI would definitely have run on the cray 2, even if it was a little bit slower than the online version of Open AI. One caveat of the cray 2 would have been lack of memory at only 2 gigabytes of ram. But that would have worked for AI as small as that sounds today. Especially when connected tape drives would put the limit to the sky if you were willing to wait. Slow thinker. **The only question is if the software was written to do it in 1985.** My guess is that people were trying back then, there's no question that 2010 is the wrong answer, that's just the **public answer.**

AI is nothing new. AI smarter than people? That's probably a 1990's thing, maybe 1998 or so. Keep in mind however that the brain does a lot more than think, computers that could match the brain in every aspect in real time came significantly later.

The supreme court forced Doge to give out some of the USAID payments.

Looks like we need several presidents in a row to fix the courts.

I did not miss the fact that the leftists freaked out over Trump's speech last night. What I did miss was the ability to care about it.

Zelensky needs to stop doing so much coke.

He has been on/off high 7 or 8 times in the last week. This has been proven by how many times he has flip flopped on minerals deals, peace deals, and everything else Ukrainian. Guy's an unstable drug addict, and it is really showing. **Meanwhile Putin has stayed the course and is offering a much better rare earth deal to Trump than Zelensky possibly could have. Russia has a LOT to offer in that area.**

Trump is right about Bill Gates. [Read this.](#)

March 4 2025

Well, somebody finally did it: REAL and truly capable AI merged with robots

This is a quantum leap even though the robot bodies are relatively old. New software and BOOM. **This software is intended to be loaded into existing robots that are totally stupid and suddenly make them smart.**

With technology that advanced, he could have told them to start shooting on the battlefield, and with no programming at all other than the AI, they would have.

Watch on YouTube

These old robot bodies can do jobs they were never programmed to do just by telling them to do it after the AI software was loaded into them. Now we accelerate into the singularity. Do that with the Boston Dynamics body and you have terminator TODAY.

People are impressed by how they don't crush the soft objects. However, Honda's asimo had that ability 10 years ago, it could pick up a heavy object with force and then pick up a paper cup without crushing it just from tactile feedback. Asimo also had flexible digits while these much cheaper robots do not. But asimo needed job specific programming. The new AI software does not. Due to Asimo's age I would bet Asimo cannot accept this software. Only a guess and Asimo is discontinued.

Not a joke: Trudeau accused the US of trying to collapse Canada's economy

Well, the US supported Canada with lots of foreign aid, **HEY I HAVE AN IDEA: How about having Trudeau allow Doge into Canada to rescue Canada from the blood suckers in the government?** Canada can then reduce taxes and the economy will recover, even with the tariffs. Alas, Trudeau would rather crash the country than purge corruption.

Visegrád 24

@visegrad24 · Follow

BREAKING:

Trudeau says Trump put tariffs on Canada to collapse its economy in order to make it easier for the U.S. to annex Canada

HEY TRUDEAU: How about actually running the country instead of milking it? The last time I checked before you stole the office Canada was quite reasonably self sufficient. **WHAT CHANGED?**

North American Union, Amero, the whole 9 yards we fought against, HERE WE COME.

Trump is going to do the state of the union address tonight, after which I expect all hell to break loose.

I saw the report when these robots were introduced, it looks like they are a success.

They are not actual thinking robots, they are highly dexterous remote hands for surgeons to use for surgery in hard to reach locations.

Iranian-Made Robots Surprising Indonesian Surgeons

Iranian-made robots, dubbed "Sina", supplied to hospitals in Indonesia for surgery purposes, are surprising medical professionals in the Asian country.

The system applies a minimally invasive approach to surgical operations by cutting a 5-millimeter incision to the body area where the operation is needed. That significantly reduces the recovery time of the patients after their operation and allows for doing more precise stitches to close the wounds.

The robots copy every one centimeter in movement of the surgeon's hands with a one-millimeter move on the body of the patient. That allows the surgeon to sew the wound back together in a larger dimension on the system console while robots are copying the stitch to the body at one-tenth of the size.

Sina is a product of some 20 years of research work at Tehran's University of Medical Sciences. People behind the project say the device is a purely Iranian system that has been built using the expertise and technology developed by Iranian engineers and scientists.

The robot has won 10 patents in the United States and other countries, while researchers have studied the system in more than 70 papers in major international scientific journals.

March 3 2025

Nothing in the news today, other than that PressTV actually has some legit news posted.

PressTV actually posted hardcore truth about what Israel recently did to Lebanon which is unusual for them, they usually skip the truth in favor of diplomacy. Not this time.

PressTV:

"I saw photos of a married couple, photos of children, toys and clothes of children among the rubble. It was something like a horror movie. There was massacre after massacre and war crime after war crime, mainly targeting displaced women and children."

Click the headline, and here is my comment:

The real problem Israel has with Iran is Shia Islam. The Shia community has been very difficult for the Jewish community to corrupt, and more importantly, is in stiff competition (as far as the Jews see it) to be number 1 before God. **So the Jews, who want to claim to be number one before God see Shia Islam as a serious religious threat.** And the Jews believe that if they can wipe out Shia, it will prove they are better - the chosen people.

When the Jews destroyed Lebanon recently, they tried to exterminate the entire SHIA community, women, children and all.

"Israel killed women and children in Lebanon. How do I know this? I know this because I saw the bodies. I saw people hanging from trees. I saw the remains of children who had been incinerated in these Israeli strikes," he stated, presenting graphic details of the Zionist atrocities.

"What we saw was horrific, the massacres... We were at sights in Batroun and in Tripoli near the North and we saw scores of people killed, 23 people here, another 27 people there. In Saida we saw the same residential buildings targeted," Sweeney told the Press TV website.

"I saw photos of a married couple, photos of children, toys and clothes of children among the rubble. It was something like a horror movie. There was massacre after massacre and war crime after war crime, mainly targeting displaced women and children."

"We saw several massacres. It is difficult to put into words exactly what we witnessed. These were precision strikes, these were deliberate attacks. The goal was to kill the Shia community and instill fear, not just among the Shia, but also among the other communities that were sheltering them," he noted.

"These people thought they were in safety, they were far away from the frontline of the fighting and they posed no threat to Israel whatsoever. This is a war crime. We saw the Shia community haunted down by Israel across Lebanon."

And Trump just handed Israel enough weapons to do the exact same thing to Iran. There's no way Trump is that evil, he's IGNORANT.

Notice that the people killed posed no threat to Israel at all. They were killed ONLY because they were Shia. Here is reality:

Israel is not afraid of Iran AT ALL. And it is not because Iran is not powerful, it is because Iran is too polite and won't strike back meaningfully when they could. Iran knows full well the entire concept of "thou shalt not kill" and is not an aggressive country anyone should worry about. Iran faces extermination for ONE REASON: Religious competition, as a totally corrupt Jewish community sees it.

I usually don't post stuff like that because I know people won't believe it. But it is accurate, Israel's beef is purely religious and Iran was actually the peacemaker over the last few months by not responding to Israeli aggression with appropriate opposing force. Perhaps Iran is afraid of getting nuked if they do respond appropriately **but the main reason why Iran only taps back rather than striking back is accountability for their actions before God.** Shia Muslims DO have a strike back policy even in their daily prayers, but they don't initiate aggression.

Quite the opposite of Israel.

March 2 2025

The firefly moon lander stuck the landing.

100 percent successful landing. Something to pay attention to. It is going to photograph an eclipse from the moon's perspective.

Russia sank a container ship in a Ukraine port

Ukraine said it was for peaceful purposes only, but when struck the weapons cache was hit and a chain reaction happened. It promptly sank. It got the weapons from a Turkish port. **The SCAMSM is reporting Russia hit it for no reason but reality is quite different.**

Sources vary as to the owner of the ship **but one thing is certain, it's a dog pile by shipping standards, it looks like it was pulled out of scrapyard prep and used for this job because someone did not want to risk anything valuable.**

© Agustin Alapont/Marine Traffic/e
The container ship **MSC LEVANTE F** carrying yellow and red shipping containers that a Russian Telegram channel claimed contained 'British sea drones and weapons from the Turkish NATO base' - a claim directly challenged by the Ukrainian vice prime minister Oleksii Kuleba who said that the vessel was carrying 'completely civilian cargo'

"Completely civilian cargo" does not have chain reaction explosions resulting in the sinking of the ship from a single missile strike to the containers above the water line. As usual, Ukraine is lying again and NATO got caught. The ship was obviously not carrying marshmallows.

UPDATE TO DOCUMENTS BELOW:

After thinking and thinking and thinking, there are 3 possibilities. 1. (and most likely), it is an actual leak.
2. Less likely but possible: It is an AI fake done by someone who had the info and did not want to get caught scanning this, if it is real it is a scan.
3. It is a hoax done by someone logically deducting that Israel would be likely to attack during the first week of Ramadan.
My guess: 1 or 2 and Iran had better have it's act together, with pre placed instructions on what to do if comms are suddenly lost. Iran is ripe for the picking right now, especially during ramadan and needs to be on full alert.

There is a typo in the document, but I attribute that to no spell check, many secure systems are stripped to bare minimum to reduce vulnerabilities. You can safely bet this came off a very boring computer.

March 1 2025

PENTAGON DOCUMENT: Israel to attack Iran in early March (probably the first week of Ramadan if not tomorrow)

If anyone can point Iran to this page do it, I tried and failed. They probably already found it because last month this site got hit 670 times from Iran. Also, this is and will be posted elsewhere already.

TOP SECRET//SCI//NOFORN//SOCCENT-J2

[CLASSIFIED - TOP SECRET//SCI//NOFORN//SOCCENT-J2] Israel: Large scale Air and Cyber Offensive against Iranian Nuclear Infrastructure 25-26 February 2025

REPORT TITLE:
(S//REL TO USA, FVEY) Israel: Large scale Air and Cyber Offensive against Iranian Nuclear Infrastructure, 25-26 February 2025.

Date: 26 February, 2025

REPORT SUMMARY:
(TS//TKI/RSEN//REL TO USA, FVEY) As of 26 February 2025, intelligence confirms that Israel is finalizing plans for a multi-faceted preemptive strike against Iran's nuclear infrastructure, set to take place as early as the first week of March 2025. The strike will involve coordinated air operations and cyberwarfare, aimed at crippling Iran's nuclear development capabilities. Alongside these operations, Mossad sleeper agents will carry out sabotage operations inside Iran, further degrading its nuclear infrastructure.

Key Operation Details:
(TS//FGI ISR//NF)

- Aerial Assault:** Satellite imagery analysis, SIGINT reports, and reconnaissance data indicate a high likelihood that the IAF will deploy a combination of F-35I Adir stealth fighters and F-15I Ra'am strike aircraft, equipped with GBU-72 bunker-buster munitions, as well as a new, more powerful precision-guided munition developed for strategic strikes on hardened nuclear facilities.
- Cyber Offensive:** Execution of cyber operations by The Israeli unit 8200 targeting Iranian air-defense radar systems, military communications, and early-warning systems to delay Iran's response and cripple its defensive capabilities. Unit 8200 is expected to employ a range of advanced cyber warfare techniques, including leveraging electronic jamming to distort and disable radar signals, rendering air-defense systems ineffective. Israel is also deploying sophisticated, long-term infiltration methods to maintain stealth access to Iranian networks and gather intelligence while preparing for coordinated disruption.

TOP SECRET//SCI//NOFORN//SOCCENT-J2

TOP SECRET//SCI//NOFORN//SOCCENT-J2

POTENTIAL TARGET SITES (TS//TKI/RSEN//REL TO USA, FVEY)

Facility Name	Type	Latitude	Longitude
Uranium Conversion Facility (UCF)	Nuclear Facility	32,580744	51,827081
Natanz Nuclear Complex Facility	Nuclear Facility	33,724229	51,726114
Parchin Ammunition Plant	Nuclear Facility	35,527676	51,765176
Khorramshahr Military Base	Military Base	30,4580556	48,1889111
IR-40 Nuclear Facility	Nuclear Facility	34,37331	49,240749
Tehran Research Reactor (TRR)	Nuclear Facility	35,738431	51,388253

TOP SECRET//SCI//NOFORN//SOCCENT-J2

INTELLIGENCE ASSESSMENT (SI//HCS-P)

- **Satellite Imagery:** Increased military activity at Nevatim and Ramon airbases, confirming

preparations for aerial refueling and munitions loading in anticipation of the strike window.

- **SIGINT:** Intercepted communications suggest Iran is heightening security protocols at key nuclear sites, though there is no indication of Iran's awareness of the exact nature and timing of the Israeli operation.
- **Geographic Focus:** The Parchin Ammunition Plant, The UCP, and The TRR are among the primary locations identified for sabotage missions.
- **Secondary Strike Capability:** Israeli Dolphin-class submarines are positioned in the Persian Gulf, prepared to target additional facilities, including Isfahan and Bushehr, in coordination with the aerial and cyber strikes.
- **Continued Monitoring:** Continuous surveillance is critical to assess Iranian responses and any counteractions that may arise post-strike.

I HATE war and the best way to avoid war is to be able to kick butt and then not use that ability. Israel is not that disciplined. Iran IS that disciplined. Iran had better get it's act together PRONTO, that leaked document is proof Iran has it's butt hanging out the door and Israel WILL take advantage.

IT IS OFFICIAL: The Jews have turned against Elon Musk.

This is happening the day after Musk and Trump totally snubbed Zelensky. Who pulls out the "Nazi" moniker and then proceeds to break things when they don't get their way? The Jews.

They'd like you to think this was a grass roots protest when really it was likely discussed at the synagogue first. Some are calling this the result of "true hate speech" fronted by the mainstream media and Congress. I call it WHINEY JEWS who are angry about their TRUE hate speech not working.

This Tesla dealer is located in Lower Manhattan, which is joined to Brooklyn by the Brooklyn bridge. Brooklyn and lower manhattan put together have a Jewish population of 950,000 so with the Nazi sign, it's a safe bet it's them. And this is why there was a protest at a Manhattan Tesla dealer:

We know DAMN WELL what happened to that money if this kind of protest is going on against DOGE in this location.

NYC: Moment when Anti-DOGE protesters charged the door of the Tesla Dealership in Manhattan this afternoon, some of those who didn't get inside blocked the entrance.

Virtually all of the EU has decided to "stand with Ukraine". A few on social media are flying the Ukraine flag and "standing with Ukraine". But the VAST MAJORITY are "standing with America".

Feb 28 2025

This web site has been shut down many times. However, Archive.org has ALL OF IT stored. [Jimstonefreelance.com](#) was shut down via coercion by the US government in 2015. Someone bought the name (I was unable to) so the current version is not mine. But 2015 and earlier is. [Jimstone.is](#) was shut down by the US government and rescued 3 times before the final knockout in 2023. Still viewable on Archive.org.

Trump made English the official language via executive order

Obviously it is and always was. America started out as a colony of England.

In case anyone missed it, Ukraine was the aggressor.

That's why Trump [kicked Zelensky's rear end out the door](#) without signing any mineral rights contract.

History:

At least six months before Russia went into Ukraine, I was ripping Ukraine BIGLY for mortaring and rocket attacking Russians who happened to live in the Donbas region. I posted several videos of Russians in the region being attacked by rockets and mortars. The Russians had every right to be there, they were leftovers from the past that identified as Russians. I reported it as Ukraine attacking its own citizens for ethnic reasons.

When Russia entered the region, it was a peacekeeping mission, and Russia wanted Zelensky ousted for aggressions in Donbas. Well, Today Zelensky DID get ousted from somewhere else, BY TRUMP, for spewing total B.S. about what was really going on there. Trump did not drink the kool aid and responded appropriately.

And that reminds me -

Any nation that is peaceful and gets attacked has a right to respond and it is not aggression, the "aggression" falls exclusively on the heads of the attacker, which in this time is Israel. Let's all hope America does not get dragged into an attack on Iran, because Iran has more than a strike only while struck policy, Iran literally has a strike only when damn near struck dead first. And look at Gaza now, the official death toll is BUNK and Iran's response was so reserved Israel has got to be laughing. Gaza has over 600,000 dead at a bare minimum, this is reflected in the stats regarding how many people live there now.

The following is probably the naughtiest page I have ever posted, so let's see what happens.

Not much in the news tody, SO:

On Space Shuttle Columbia's maiden voyage, it mapped the entire middle east with ground penetrating radar to a depth of 20 meters

I am not going to link a bunch of stuff, I am just going to chat but to prove it is not BS [CLICK THIS](#). Now that you have read that, the real primary mission of all the space shuttles was to root out all the bunkers and underground facilities in the entire middle east, and "geology study" was the cover for it.

There's plenty of documentation for this, And the radar used literally made sand disappear and THEN show everything under the sand to a considerable depth.

How long have I known about the space shuttle and ground penetrating radar? SINCE I WAS 13 YEARS OLD. If you are under threat from the United States or Israel, please be aware of the fact that with the newer technologies (space shuttle is gone now) but that was not the end of ground penetrating radar - and EVERY bunker, EVERY missile, EVERY LAST BURIED ASSET every country in the middle east has is totally known and mapped with crystal clear detail. Resolution 50 meters? NOT TRUE, the resolution is more like the thickness of your fingernails. Even Columbia mapped it to a resolution of less than 10 meters, this was published in National Geographic in the (very) early 80's and that's where I learned about it. The detail Columbia mapped with was stunning and it was the first. It showed EVERY underground feature. Is anyone stupid enough to believe the tech would not be mastered to a pinpoint in the subsequent 40 years? PERHAPS.

NEXT.

Based on what I have recently seen with the lack of knowledge in a foreign government it appears to me that at least some governments get all their intelligence updates from Wired Magazine and Apple. Come on now people, if your work is important, even for a company, **LEAVE YOUR ANDROID AND APPLE PHONES IN A SLOT NEAR THE DOOR, AND I MEAN EVERYONE HAS THEIR OWN SLOT AND FORBID ALL SUCH DEVICES ANYWHERE THAT MATTERS AND DO ALL EXTERNAL COMMUNICATIONS WITH LAND LINES AND IMMEDIATELY FIRE ANYONE STUPID ENOUGH TO PHOTOGRAPH OR TRANSLATE A SENSITIVE DOCUMENT WITH A CELL PHONE.. FFS.** did I ever get an eye opener recently, some countries leave their butts hanging an inch above the shark tank. That's a perfect way to lose EVERYTHING.

And by the way, every INTEL processor made since sandy bridge in 2011 has a permanent NSA back door x 1000

All Intel processors made in the last 14 years cannot be secured no matter what you do. This is because ever since Sandy Bridge every processor made by Intel has 2 processors on the die, one for you, and one for the NSA. The one for the NSA has its own memory right on the main CPU die and the processor itself is approximately as powerful as a 486 DX266. That does not sound like a lot, but when it comes to data rape, it's just perfect. This processor runs a variant of Unix called MINIX which adds an extraordinary level of efficiency that helps it work within its limits.

Intel allowed people access to this processor with "Core Vpro" as the name for administration and "updates" while the computers were turned off for the night, the second processor never sleeps so it can always be called on to install new software and update the computers OR STEAL

YOUR DATA. What administrators don't know is that the NSA has about 1,000 different back door access points that are approximately as secure as SHA256. No administrator would ever be aware that those back doors are there, I don't know of any successful attempts by ordinary people to find one. But the NSA just goes right in

And what about Microsoft? You had better not be using Microsoft for ANYTHING secure, those "updates" are not for you, curious it is that they are always a gig plus, what on earth could Microsoft possibly need to constantly do "updates" that big for? The NSA, that's what. Every document, everything done with the computer goes straight out during an "update", and after the update, nothing perceptible changes (usually) because that update was NOT to make your system better. **So what operating system DOES give the NSA difficulty?**

THIS ONE.

LINUX IS THE ANSWER. Knoppix 5.1 running live off CD with a drive that has the burning laser disabled. And I strongly suggest using only old pre 2010 AMD processors for ALL SENSITIVE DATA because *in addition to the back doors* many Intel processors also feature full time cell phone uplink that works full time, forever, ABSOLUTELY FREE. The reason originally given for that is if your computer got stolen you could wipe it out, you know, like this:

Intel® Anti-Theft Technology can now lock, unlock, and locate
remotely—even when the operating system is not running. Laptops
with the 2nd generation Intel® Core™ processor with Intel® Anti-Theft
Technology1 (Intel® AT) provide IT administrators with intelligent
protection of lost or stolen assets.

Intel

Dell
<https://i.dell.com/business/smb/documents/PDF/> :

Protect Laptops and Data with Intel® Anti-Theft Technology

Intel AT gives you the ability to disable your PC with a local or remote poison pill if the system is lost or stolen.

3 páginas

HEY, do you know what that means? It means that at YOUR most critical hour, the NSA is going to "phone" ALL your Intel processors and blow them up.

I KNOW you do not know this if you're using android phones for sensitive work, for GOD'S SAKE WAKE UP.

The Stupid, It Burns

Feb 25 2025

I keep forgetting to mention it, but [Charles C Ripley](#) was the reactor engineer I interviewed for the [Fukushima report](#).

The linked twitter is to my best friend, who was my contact to Charles. This is mentioned in the second paragraph.

Initially I did not want to post his name because I thought people would start saying "believe it or not" and that's the only reason why it was not published 14 years ago.

Charles C Ripley specifically designed reactor 3 for Fukushima. He was blown away by my understanding of nuclear topics, especially when out of the blue I said the BWR3 was 33 percent efficient because it ran at 1,050 PSI, and I asked him why he did that. He said so that there would be excessive safety margins while still having a system that worked very well. I did not put that level of detail in the Fukushima report because it was not needed, and I said many other things that surprised him, he had many interviews with the press before and he said I was the absolute first that actually accurately understood nuclear topics.

So I went over all the technical stuff in the Fuku report and he said all of it was bang on. **I then said there's no way that system can explode and he said "That's what I thought also, but I must have gotten the math wrong because it did explode."** And then I told him about Israel and Stuxnet and tsunami nukes, and he rejected it completely, not believing Israel could possibly do such a thing. Too bad, he really believed his life's work was defective. Israel successfully insulted one of the greatest minds that ever lived.

A few quick items

The CDC, in defiance of Trump, met with the WHO today. Time to end the agency altogether? Please me.

It looks like the Keystone pipeline is back in the works. That does please me.

Eggs have gotten so expensive that Denny's restaurants are now adding egg surcharges. **Curious: Eggs are only about \$1.60 USD a dozen in Mex, medium/large (not jumbo) when bought by weight.** Pre packaged, large eggs are just north of \$2 per dozen. Why are prices over \$8 in the US? Bird flu is the excuse, I say politics.

1,000 national park service workers fired. I don't know how that will make a difference as long as the camp sites are open.

[TRUMP'S DESK BUGGED](#) True? Well, there's a new desk there now. Probably also bugged.

POSSIBLE INTERNATIONAL PROBLEM TODAY:

American mercenaries taken out by Russian troops in Ukraine, TODAY.

There are people saying this is fake. I put it back up because the gunshots at the beginning echo in the woods properly and obviously are not fake, and at close range the last 4 shots overload the cell phone mic. Probably not fake.

I don't know how Trump is going to handle this one. Putin is definitely not going to be pleased with Americans running around fighting for Ukraine.

X

Disturbing Video.

Footage of what appears to be a Russian special operations team ambushing an English speaking Ukrainian patrol.

"It's a fucking trap" is the last thing heard uttered in an American accent.

The footage was recovered from the body of the American fighter.

OK, NOW THIS is a diversity hire problem.

A jet crossed the runway when another jet was landing. This is NEVER supposed to happen and was definitely caused by un-qualified people, most definitely DEI, or DIE.

If the Southwest flight did not have enough speed left to take off again, there would have been a massive accident. Perfect camera work. I'd say there is a BIG PROBLEM in air traffic control if this type of thing happened, the last time something like this happened it was at Tenerife airport in the Canary Islands in 1977 where two jets collided just like this almost happened, killing 587 people.

If the Southwest flight did not pull up, we'd have had exactly this today:

The difference? No fog. If there was fog, the Southwest flight would not have seen it coming. Good thing the pilots were paying attention.

Last week Musk sent out e-mails to federal employees asking them to say what they did that week.

There was an uproar, and many said they were caught off guard. SO Elon sent a second mail this week, and failure to reply with an adequate response will mean an automatic resignation. Trump told Elon to give them a second chance, with THIS ATTITUDE:

President Trump on DOGE emails: "I thought it was great...by asking the question, 'tell us what you did this week' what he's doing is saying 'are you actually working?' and then if you don't answer, like you're sorta semi-fired or you're fired..."

My comment: FACT:

20 percent of the people do 80 percent of the work in practically every work force. The rest are dead weight, unless, for example, the job is running a machine or working a cash register, where you can't slack off.

PET PEEVE: We are being hoaxed on robots.

These robots were made by Sony 20 years ago. Tell me, what is the substantive difference we are seeing in the new models now? I have a hunch that any time anyone makes anything truly great, it gets bought out and discontinued so people don't even begin to suspect or know about advanced robots that might even be playing roles as people.

Come on now, look at the date on this video and try to tell me we are STILL AT THAT LEVEL. Sony never brought these robots to market despite huge demand. Why? These were introduced in 2003 and discontinued in 2006. There would be a market for this. Yet we can't buy it. We are being hoaxed BIGLY.

NOTICE. NO WIRES ATTACHED. They are free roaming robots.

Notice, they have working hands and a little over half way into the video the two with the Japanese fans throw the fans. Look at the date of the video by clicking the YouTube link. THIS VIDEO IS 19 YEARS OLD. What happened to progress in robotics? It's called subversion. Keeping people ignorant.

You can surely bet that there's going to be a BIG SURPRISE on the battlefield soon. If a 12 pound robot could do that 20 years ago we have got to be at the Terminator level now when expense is not considered.
